

## Report for 9th Jan

- Chaincode is working (tested)
- Implementation of Marketplace gotten far (nearly done)
- Setbacks with Composer - more limited than anticipated
  - Code generation does not work in the anticipated way
  - Leading to some reengineering
- Frontend and simulator got delayed
- Privacy and encryption still missing
  - Lower priority since need for working Demo

## Plans for upcoming week and presentation

- Queries (difficult)
  - Not testable in composer playground
  - need of REST interface
- Hooking up frontend with backend
- Simulation/Demonstration
